

SHREYANSH SRIVASTAV

Software Developer

Gautam Buddha Nagar, Knowledge Park 3, 201310, India • shreyansh3854@gmail.com • +91 89600 38466

SUMMARY

Motivated Computer Science (AI) student at G.L. Bajaj ITM with a strong foundation in Java, Data Structures & Algorithms, and full-stack web development. Solved 250+ algorithmic problems across Codeforces and LeetCode. Actively building industry-relevant AI/ML competencies through rigorous hands-on projects, open-source contribution, and notable competitive hackathon achievements.

EDUCATION

G.L. Bajaj Institute of Technology and Management

Aug 2024 – May 2028

Bachelor of Technology (B.Tech) in Computer Science (Artificial Intelligence) — Greater Noida, UP

TECHNICAL EXPERIENCE

Full-Stack Developer — Library Management System (Personal Project)

Jan 2024

- Engineered a high-performance full-stack web application leveraging Express.js, Supabase, and Vanilla JavaScript.
- Architected a multi-role authenticated dashboard architecture (Superadmin, Admin, Student) utilizing Supabase Row-Level Security (RLS) policies to ensure robust, real-time data isolation.
- Integrated core utilities including automated fine calculation, dynamic CSV export engine, server-side PDF printing, and native route authentication; continuously deployed to Railway via automated GitHub CI/CD pipelines.
- Demonstrated self-sufficiency by resolving complex production RLS multi-tenant policy conflicts and structural Git configuration errors independently.

Full-Stack Developer — Automated Attendance Website (Personal Project)

Jan 2024 – Dec 2024

- Designed and launched an automated attendance web application leveraging a scalable stack of HTML, Tailwind CSS, and JavaScript.
- Programmed a secure user authentication layer coupled with real-time transactional data-processing pipelines optimized to accurately capture high-velocity records.
- Delivered a fully responsive and optimized UI layout, designing underlying system architectures to seamlessly handle high-concurrent updates during peak logging windows.

Competitive Programmer — Independent Practice

Jan 2022 – Present

- Solved over 250 structured algorithmic challenges on LeetCode spanning core data structures including multi-dimensional arrays, binary trees, dynamic graphs, advanced backtracking, and dynamic programming.
- Mastered comprehensive Data Structures & Algorithms tracks natively in Java; consistently solving challenging problems on Codeforces and the CSES Problem Set (100+ specialized competitive problems resolved).
- Proficient in rigorous runtime/space complexity estimation, mathematical optimization, and bit manipulation.

HACKATHONS & LEADERSHIP

National Level Competitor — Smart India Hackathon 2024

Jan 2024 – Dec 2024

- Ranked in the top 45 out of 350+ standard teams nationwide, evaluating solutions against premier student engineering cohorts across India.
- Collaborated in an agile 6-member team to construct a comprehensive solution addressing enterprise-level manual attendance bottlenecks at scale.

Technical Team Lead — College Hackfest 2.0

Jan 2024 – Dec 2024

- Directed full end-to-end technical execution and workflow delegation for a student engineering group under G.L. Bajaj Institute of Technology and Management; placed in the top 3 overall team finalists.

TECHNICAL SKILLS

Languages: Java (Core & Advanced), Python, C/C++, JavaScript (ES6+)

Web Technologies: Node.js, Express.js, HTML5, CSS3, Tailwind CSS, Vanilla JS

Libraries & ML: NumPy, Pandas, PyTorch, Data Structures & Algorithms (DSA)

Tools & Cloud: Git, GitHub, Amazon Web Services (AWS), CI/CD, Supabase

CERTIFICATIONS & CREDENTIALS

- **AWS Academy:** Machine Learning Foundations Certification
- **Red Hat:** RH134 Red Hat System Administration II Completion
- **GirlScript Summer of Code (GSSoC 2020):** Core Algorithm Track Contributor
- **Palo Alto Networks Academy:** Cybersecurity Basics Certification
- **EF SET:** English Certificate B2 Upper-Intermediate Level Baseline
- **Cisco Networking Academy:** Network Essentials
